

DRAFT

MEMORANDUM FOR: IAC

**SUBJECT: Coordination of Intelligence Activities
Regarding the Taiwan Crisis**

1. As a means of providing prompt and authoritative current intelligence summaries to the President regarding the Taiwan situation, the IAC has established the ad hoc sub-committee meeting daily in the National Indications Center.

2. It is also essential that intelligence support on Taiwan for the U. S. Commander as well as reporting to Washington be as effective as possible. The intelligence community should do all that it can to ensure against a failure of intelligence at a critical moment. The suggestion which Admiral Carney made on the occasion of his recent visit to [REDACTED] a U. S. joint intelligence center, strengthened by additional personnel, appeals to me as a practical measure to meet the critical situation

3. Accordingly, I suggest that the IAC endorse with me this proposal for joint effort on Taiwan to Admiral Stump and further recommend to him that an intelligence coordinating committee be established [REDACTED] under the chairmanship of his senior intelligence officer, for the duration of the emergency or until such time as circumstances suggest such a mechanism is no longer required.
